HTML	HTML er et dokumentorienteret sprog, som anvendes ved fremstilling af simple hjemmesider.
ASP.NET	ASP.NET er en teknologi til fremstilling af dynamiske hjemmesider. Dette er hjemmesider, hvor der kan indtastes data af brugerne, som så senere kan kaldes frem. Eksempler på hjemmesider som anvender ASP.NET findes indenfor rejsebureaubranchen. Ejeren a bureauet kan meget nemt opdatere hjemmesiden med nye destinationer, og de besøgende på hjemmesiden kan udføre reservationer, eller give feedback på de leverede tur-arrangementer.
PHP	Dette er et programsprog, som giver næsten same funktionalitet, som det der findes i ASP.NET. PHP er en smule billigere at hoste. Imidlertid er hjemmesider udført i PHP ikke så stabile, som dem der er udført i ASP.NET.
JSP/JAVA	Dette er teknologier, som giver næste de same funktioner, som de der findes i ASP.NET, dog med nogle begrænsninger. Det koster det samme at hoste disse, som det koster at hoste ASP.NET, hvorfor disse kun anvendes når det forlanges af kunden.
FLASH	FLASH er en teknologi, som anvendes ved udførelse af interaktive animationer, i forbindelse med pæne præsentationer eller filmklip, på hjemmesiden.
MySQL	Er en open source database server, som er billigere at hoste ved end MSSQL.
MSSQL Server	Dette er en database, som kan bearbejde større mængder data, som er mere stabil, pålidelig, sikker og dyrere end MySQL.
ORACLE	Sandsynligvis en af de bedste database servere i verden, som primært anvendes til store CRM-systemer og meget store databaser.
